\*SCAO initiated a weighted caseload study in the summer of 2006 to help determine performance funding eligibility at the local centers. Case weights were determined for each case dispute type based on time studies performed at the local centers. The individual case weights were revised in late 2007 and multiplied by each centers' caseload to calculate the weighted caseload score. The scores noted above reflect cases disposed for the period October 2007- September 2008.

\* The CDRP enabling legislation, 1988 PA 260, requires grant recipients to annually provide an estimated cost of hearing. Hearings do not take place in the practice of mediation; so instead, SCAO calculates an estimated cost of a mediation event. The average duration of each center's mediation is shown on the center's statistical report. The estimated cost per mediation (hearing) shown here has been calculated by dividing each center's CDRP award by the annual number of hours the center is open; this quotient is then multiplied by each center's average duration of mediation.
