MEMORANDUM

DATE: January 26, 2012

TO: Chief Judges
cc: Court Administrators
Probate Registers
County Clerks
Authorized Users of the Caseload Reporting System
Case Management System Providers

FROM: Laura Hutzel

RE: New File Formats for Caseload Reporting

As you know, Administrative Order 2011-3 established new time guidelines for caseload management. This memo provides case management system providers with updated file formats needed to implement changes to Part 4 of the Caseload Reporting System (CRS).

The 2012 caseload reports, due in early 2013, should conform to these new file formats, therefore, case management systems should be updated this year after the 2011 reports are submitted and verified. If you have any questions about caseload reporting, contact Kimberly Tody by e-mail at todyk@courts.mi.gov or by phone at 517-373-5538.

As a reminder, each court must update its caseload management plan to conform to the new guidelines. If your court has not yet submitted a new local administrative order, please do so using the updated Model LAO 22 now available at: <http://courts.michigan.gov/scao/resources/other/lao.htm>. If you have any questions about caseload management plans, contact one of the Trial Court Services' analysts:

File Formats for the Submission of Electronic Caseload Data

Caseload Reporting System – Circuit Courts

1 Introduction

This document describes the record layout for submitting data electronically to the Caseload Reporting System (CRS). Data so submitted will be imported into an Oracle database, and that data will then be used for generating reports. Courts with a caseload management system may be able to create the data file with relative ease, but the data file must conform to the following record layout in order for the CRS to understand the data and store it properly.

1.1 Submission Mechanism

The CRS includes web-based functionality to submit the data file online, meaning a court must be connected to the public Internet or the Supreme Court intranet. The user attempting to submit the data file will sign on to the application using a web browser. The user will enter a drive, path, and filename to select the file to be submitted, and the application will transfer the file to a JIS-based server. The submission will be recorded in a database, and the file will be processed. The user will then be able to view the submitted data using web-based data entry screens.

2 Electronic Data File Format

2.1 General Format

All data submitted electronically shall be in ASCII format, enclosed in quotes, and comma delimited; i.e., "xxxxxx", "xxxxxx", and so on. An empty field (") is considered null. Each record in the file will represent a single data value. A record is a series of ASCII characters terminated with a carriage return-linefeed character. The elements of each record will identify which data value it represents, so that the type of data (Circuit court) and the quarter, year, county, court code, as well as the part, section, bar number (Part 4 only), action, and case type combine to refer to a single field on a particular caseload report form. The bar number is required for Part 4; for Parts 1 and 2, the field of the bar number should appear as a value of 0. This record layout will require data to be written out redundantly, but allows each record to be dealt with independent of any other record in the file.

2.2 Record Format

The format shall be as follows:

"TYPE","QTR","YEAR","COURT","COUNTY","PART","SECTION","BAR NUMBER","ACTION","CASETYPE","VALUE"

2.2.1 Field Definitions

"TYPE"	= Data Type: "C" (circuit)
"QTR"	= Report Quarter "1", "2", "3", or "4" ("4" indicates full year data)
"YEAR"	= Report Year "2002", "2003", etc.
"COURT"	= Court Number as defined below
"COUNTY"	= County Name that, along with the court number, identifies a specific court jurisdiction
"PART"	= "1", "2", or "4"
"SECTION"	= "A", "B", "C", etc.
"BAR NUMBER"	= A 7 digit code as defined below
"ACTION"	= A 2 to 4 digit code as defined below
"CASETYPE"	= A 2 digit code as defined below
"VALUE"	= Null value (") or whole number value of 0 or greater

Examples:

"C","4","2003","C10","Saginaw","1","E","0","BP","DL","5"
"C","4","2003","C10","Saginaw","2","E","0","BV","DL","12"
"C","4","2003","C10","Saginaw","4","E","P000000","A1","DL","2"

The first example is for circuit data ("C"), full year ("4"), year 2003, 10th Circuit Court ("C10"), the county of Saginaw, Part 1, Section E, 0 (since there is no Bar Number for Part 1), action Beginning Pending ("BP"), case type DL, with a value of 5.

The second example is for circuit data ("C"), full year ("4"), year 2003, 10th Circuit Court ("C10"), the county of Saginaw, Part 2, Section E, 0 (since there is no Bar Number for Part 2), action Bench Verdict ("BV"), case type DL, with a value of 12.

The last example is for circuit data ("C"), full year ("4"), year 2003, 10th Circuit Court ("C10"), the county of Saginaw, Part 4, Section E, Bar Number (as required for Part 4), action dismissed within 84 days, juvenile detained ("DP1"), case type DL, with a value of 2.

This format provides flexibility when submitting the data so that there are no expectations about groups of records; each one is considered independently. It is possible, though improbable, that probate, circuit, and district data can be intermixed, record by record, and that the values can be listed in no particular order regarding their section, part, action, or case type. It is likely that the reports used to create a data file will create the records in sequence; for example all the Part 1 data listed from Section A through the last section, and all the actions and case types grouped together. This approach duplicates what might be considered header information on every detail line.

2.2.2 Field Names, Attributes, and Length

Field Name	Attributes	Max Length
TYPE	Alphabetic	1
QTR	Numeric	1
YEAR	Numeric	4
COURT	Alphabetic, Numeric	5
COUNTY	Alphabetic	25
PART	Numeric	1
SECTION	Alphabetic	1
BAR NUMBER	Alphabetic, Numeric	7
ACTION	Alphabetic	4
CASETYPE	Alphabetic	2
VALUE	Numeric	6

2.2.3 Submission of Files

The electronic files may be submitted repeatedly in order to correct or complete the data. That is, if a particular field is missing, or has a null value (""), the submission will be accepted, and the data available will be processed.

Subsequent submissions will be appended to the existing values in the database. If a field in the submitted file has a null value ("") it will be ignored, and the existing value in the database, if any, will remain unchanged. Similarly, missing values in subsequent submissions will not affect existing values in the database.

2.2.4 Court Codes and Counties

The following table lists the court codes and their corresponding counties; jurisdictions are included to further define each court. The court code and county together create a unique identifier for each

jurisdiction. Data will be reported for each of the jurisdictions; however, totals will not be combined for multi-county courts; i.e. "C19", which contains data submitted from two counties.
