

MiCOURT

Case Management System

JIS

The premier **case management system**

designed for Michigan Trial Courts

MiCOURT is more than a case management system...

It is the only case management system created for Michigan trial courts by staff dedicated to the needs of Michigan courts.

MiCOURT is built to meet the needs of all court jurisdictions and is built for flexibility to meet required changes from Michigan legislative or SCAO requirements without additional cost for the court.

**...carefully crafted by staff
who know Michigan courts.**

The MiCOURT goal: setting the standard

MiCOURT is designed with a simple goal in mind: Helping Michigan courts become a national model of efficiency and customer service.

The MiCOURT experience

Based on more than 30 years experience supporting Michigan trial courts, MiCOURT provides a feature-packed application that will save staff time — and help your court become more efficient.

MiCOURT is a cost effective, Windows-based “one court” case management system.

The MiCOURT experience includes:

- JIS Learning Center for 24/7 online learning based on your role in the court.
- JIS Support Desk, where users have come to expect and enjoy a level of support that they can't get from other vendors. JIS staff cater to individuals who may need additional assistance.
- Court Rollout Portal to share documents during your transition.

What is MiCOURT?

MiCOURT is a combined case management system for Circuit, District, and Probate courts.

What does MiCOURT do?

MiCOURT provides your court with details for record keeping, case-flow management, financial management, and administrative reporting.

What does the new MiCOURT offer?

MiCOURT keeps the best features of the previous JIS applications for trial courts and adds dozens of new, time-saving features, including:

- Collections tools including billing statements, collection notices, and payment plans
- Shared receivables for Joint and Several Restitution and automated disbursement process
- Easy drop down menus so the user doesn't have to memorize codes
- Automated feature for abstracts: eliminates the necessity to send abstracts manually
- Automated calendar function eliminates the need to count days

The new look and feel of the integrated MiCOURT is a great improvement from the individual “green screen” versions of the other applications. However, with many wonderful improvements, my favorite is the ease with which you can create/save a form and a public register of actions. This functionality will make records transfer, appeals, and noticing of cases a much more efficient process in district, probate, and circuit courts across the state.
